Lumashine Infrared Color Processor
Infrared technology penetrates hair follicles and dries hair from the inside out. Hair is dried faster and with less damage, leaving it smooth and manageable. The ozone function helps bond dyes and molecules to hair to help protect and condition hair by “locking in” dye for a more vibrant long-lasting color.

- Infrared heat technology
- 30-minute digital timer
- Variable heat settings
- Separate ozone, infrared and fan settings
- Tilt-hood design

Infrared Color Processor
The Bravura advanced processor embodies the newest technology, harnessing the power of quartz infrared. Easy-to-control dials make operation a cinch. Five independently controlled heat zones allow the operator to isolate application area(s). Available on floor stand with casters only.

- Easy to operate, yet highly versatile
- Bravura features straightforward time, temperature and infrared controls to cater to individual client conditions
- Independently controlled heat zone allows precise application of infrared heat to accelerate color processes
- Operator can choose to have all heat zones on or focus on particular areas, particularly useful in root touch ups
- Large opening allows easy access in and out while accommodating foils, rollers, and rods
- Telescoping pole assembly for adjustments to varying seated customer heights
- Heavy-duty roller caster base is designed to provide a stable footprint and allow the dryer to be pulled up close to backs of salon seating
